Take Hall's Catarrh Pills for constipation.

## 30,000 VOICES

## And Many Are The Voices of Hillsboro People.

Thirty thousand voices—what a grand chorus! And that's the number of American men and women who are publicly praising Doan's Kidney Pills for relief from backache, kidney and bladder ills. They say it to friends. They tell it in the home papers. Hillsboro people are in this chorus. Here's a Hillsboro case.

Theodore Murphy, carpenter, Elm & Pleasant Sts., Hillsboro, Ohio, says: "I don't hesitate to recommend Doan's Kidney Pills, for they have always given me relief when I have had occasion to take them. A good many of my friends have used Doan's Kidney Pills with very beneficial results. I advise everyone to give them a good trial, for I know what they will do. I have had no reason to change my opinion of Doan's Kidney Pills since recommending them some years ago."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

## NEW PETERSBURG.

Sept. 7, 1913.

"So your baby won a prize at the baby show?"

"Yes," replied the proud but worried father. "And I guess we'll move out of the community. All the envious mothers will resent it as long as he lives."—Washington Star.

## EVEN FLOWERS MUST LABOR

Nature Demands Its Toll From Every Living Thing, and Accepts No Excuses.

However fine and dainty a flower may look, it is pressed to do a great service and its colors and forms are all suited to its work. It must bring forth the fruit, or the continuity of plant life will be broken and the earth will be turned into a desert ere long.

The color and the smell of the flower are all for some purpose, therefore no sooner is it fertilized by the bee, no sooner does the time of its fruition arrive, than it sheds its exquisite petals and a cruel economy compels it to give up its sweetest perfume. It has no time to flaunt its finery, for it is busy beyond measure.

Viewed from without, necessity seems to be the only factor in Nature, for which everything works and moves. There the bud develops into the flower, the flower into the fruit, the fruit into the seed, the seed into a new plant again, and so forth, the chain of activity running on unbroken. Should there crop up any disturbance or impediment, no excuse would be accepted and the unfortunate thing so choked in its movement would at once be labeled as rejected, and be bound to die and disappear post haste.

In the great office of Nature there are innumerable departments with endless work going on, and the fine flower that you behold there, gaudily attired and scented like a dandy, is by no means what it appears to be, but rather is like a laborer toiling in the sun and shower, who has to submit a clear account of his work, and has no breathing space to enjoy himself in a playful frolic.—Rabindranath Tagore, in the Atlantic Monthly.

## MAIL CLERK UTTERS PROTEST

Wall Should Appeal to Those Who Have Habit of Pinning Their Written Sheets Together.

"If people must stick pins into their letters, I wish they would cover up the points so that they wouldn't push through," said a mail clerk whose hands were disfigured by tiny scratches. "I must get about a hundred digs a day from pins that systematic folks use to hold their correspondence together. I never could make out, anyhow, why so many letters need to be finished off with a pin."

"Of course, I understand that about half of those written by women have a postscript in the shape of samples of dress goods or newspaper cuttings, which perhaps require a pin or two to hold them in place, but even that habit cannot account for the large number of letters that come through the post-office with a pin sticking out of one corner."

"I have come to the conclusion that many writers so mail their manuscript with malicious intent. It may not be us fellows in the postoffice against whom they hold a grudge, but we are the ones that usually get the benefit of those pins."

## How to Wed.

Why should not the church which solemnizes marriage go behind the ceremony, encouraging young people to wed and giving them needed instruction concerning marriage life? Just this the New York diocese of the Protestant Episcopal church proposes to do. In the discussion of the marriage problem it was unanimously agreed that health certificates should be required for marriage. The much greater problem of how the church is to bring young people together with marriage as the aim and how to make the married state happy and permanent has been turned over to the social service commission to work out.—Leslie's.

## Manners Can Be Acquired.

An English critic says that the athletic girl has no manners and has other faults. But after the brilliant showing of a little Baltimore girl lately in rescuing several children single-handed from a burning house, a rescue made possible by her practice at athletic exercises, the lack of polish more or less can easily be forgiven. Manners can always be acquired, but it demands very quick action and ability to save lives. The mistake of such critics is to lay the blame on athletics when that blame is due to entirely different causes. The old idea that gentleness went with weakness and womanliness with timidity is now exploded.—Baltimore American.

## Profitable British Fisheries.

The British fisheries yield about 2,500,000,000 pounds annually, for which the "ultimate consumers" are believed to pay at least \$125,000,000. In view of the part which herring and other small fishes play in this total, it may be within the truth to estimate the number of fishes caught in an average year by the fishermen of the United Kingdom, at two billion or more. For all Europe this enormous number may be multiplied by three, perhaps by four.

## Dry Dock a Dutch Invention.

A correspondent in Holland draws our attention to the fact that the construction in that country of a floating dock of 14,000 tons, for Soerabaya harbor in the Dutch Indies, should remind us that the floating dry dock is a Dutch invention, and that many floating docks of this type are built on Dutch ways and towed to their destination. Dry-dock towing is a specialty, and many foreign-built docks are towed to their destination by Dutch tugs.—Scientific American.
